

TRAY AND TRAYLESS OPTIONS

Verst's fully automated shrink bundle wrap offers two options: tray or trayless. In the first option the product is placed in a tray, while the trayless product is configured into patterns without a tray. Either option wraps film around the product to create a bullseye-style shrink bundle. Accurate placement of printed graphics on each bundle is ensured. The finished package is an easy-to-carry, unitized bundle that is attractive to the end consumer.

SPEED - TRAY

Tray Maximum Speed: Up to 70 Packages Per Minute

SPEED - TRAYLESS

Tray Maximum Speed: Up to 65 Packages Per Minute

PRODUCT RANGE - TRAY

Minimum Product Size: 6" W x 5" L x 3" H
